### **A Guide to Close-up Nature Photography**

If you're buying a tripod just for close-up photography, it doesn't have to get very tall or have a super-strong head to hold long lenses steady. On the other hand, you may want those features if you photograph things other than just bugs and flowers. A good close-up photo tripod allows you to get the **Macro and Close-up Lenses - Amazon Web Services**

By its very nature, macro photography (and to a lesser degree close-up photography) has always caused challenges for lens manufacturers, and this is no different for digital cameras. What has changed is the ease and precision of shooting at close distances, because the uncertainties introduced by the various optical calculations disappear with
