Engineering Design Report - University of Michigan

current design is the result of intense engineering efforts and analysis This report serves to document the entire process from initial background research to final recommendations for improvement to the final design This report documents the entire design process including the final manufacturing plan, the

DESIGN OF EXPERIMENTS (DOE) FUNDAMENTALS

design on the right by adding up the number of + and - marks in each column We see that in each case, they equal 4 + and 4-values, therefore the design is balanced •Yates algorithm is a quick and easy way (honest, trust me) to ensure that we get a balanced design whenever we are building a full factorial DOE Notice that the number of

Software Design Models, Tools & Processes

- The software design process involves gaining knowledge about a problem, and about its technical solution
- We describe both the problem and the solution in a series of design models
- Testing, manipulating and transforming those models helps us gather more knowledge
- One of the most detailed models is written in
